PROFESSIONAL SUMMARY

Results-driven QA Automation Engineer with 2.5+ years of experience in web, mobile, healthcare, and government applications. Strong expertise in Playwright automation using JavaScript/TypeScript, building scalable test frameworks, and automating end-to-end, UI, and API testing. Automated 300+ test cases, reducing manual testing effort by 40% and improving release quality through comprehensive regression coverage. Proficient in REST API testing, CI/CD integration, defect analysis, and Agile/Scrum methodologies. Experienced in delivering high-quality software solutions with a focus on reliability, test efficiency, and continuous improvement.

EXPERIENCE

QA Engineer | Tanama Software

July 2025 – Present

Project: Capture — US Property Tax Administration System | Tax Domain | Revenue & Government Systems | Alabama, USA

- Designed and developed a scalable end-to-end UI automation framework using Playwright with JavaScript S and Playwright Test Runner, following Page Object Model (POM) and fixture-based architecture.
- Implemented custom fixtures for reusable test setup, authentication handling, and cross-test dependency management, improving execution efficiency and maintainability.
- Automated 300+ UI test cases covering critical business workflows, including regression, smoke, and sanity suites.
- Tracked and managed defects in JIRA, achieving a 95% on-time defect closure rate and reducing critical defect leakage by 28%.
- Executed automated test scripts using JavaScript with Playwright, generating test reports via Allure Reports and Playwright Trace Viewer to streamline defect analysis and improve test visibility.
- Integrated automated test suites with Docker-based execution environments using Docker, ensuring consistency across environments.
- Integrated HTML and Allure reporting, screenshots, and video capture for failure analysis.
- Configured and maintained CI/CD pipelines using GitHub Actions, enabling automated test execution on every build and deployment.

Associate QA Engineer | Seanergy.ai

Feb 2025 – June 2025

Domain: Medical Device Testing | Fluke Biomedical | Healthcare Quality Standards | System Reliability & Compliance

- Designed 200+ test cases using Boundary Value Analysis (BVA) and Equivalence Class Partitioning (ECP), increasing test coverage by 40%.
- Applied SDLC, STLC, and Defect Life Cycle practices in Agile/Scrum sprints, improving delivery efficiency by 15%.
- Performed API and backend validation ensuring 98% data accuracy and reducing API-related production issues by 30%.
- Conducted database testing using SQL queries and data validation, improving data integrity compliance by 35%.
- Developed and maintained a Requirements Traceability Matrix (RTM), achieving 100% requirements coverage and reducing requirement gaps by 25%.
- Collaborated during defect triage, reducing rework cycles by 20% and improving defect resolution turnaround time by 18%.
- Automated API test workflows using Postman collections, pre-request scripts, and environment variables, reducing manual testing effort by 40% and improving testing efficiency.
- Validated CRUD operations through database testing using SQL queries, ensuring data accuracy and integrity across all application modules.

Testing Engineer Trainee | **Dhanush Infotech | E-Ring IT Solutions Pvt. Ltd.** *Apr 2024 – Jan 2025*

Projects: 1962 Veterinary Services (Haryana Govt.) • Staff App (Mobile) • Tracnovate Ambulance Tracking System

- Analyzed Business Requirement Documents (BRD) and derived 180+ test scenarios, improving functional coverage by 35%.
- Designed and executed Functional and Regression test cases across web and mobile platforms, reducing regression defects by 30%.
- Performed Smoke, System, and UAT testing, contributing to 20% faster production deployment cycles.
- Conducted Root Cause Analysis (RCA) on recurring defects, reducing the repeat defect rate by 25%.
- Supported UAT cycles, achieving 90%+ client satisfaction score and reducing post-UAT change requests by 22%.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript
Frameworks	Playwright, Automation Framework Design, UI & API Automation, End-to-End Testing,
Design Patterns	Page Object Model (POM), Fixtures, Playwright Test, BDD Cucumber
API Testing	REST API Testing, Playwright API, Postman, Swagger
CI/CD Tools	Jenkins, GitHub Actions, Docker
Version Control	Git, GitHub, Bitbucket
Reporting	Allure Reports, HTML Reports, Playwright Trace Viewer, Test Rail
Test Mgmt.	JIRA, Test Strategy, Test Planning, Defect Analysis, Risk-based Testing
Databases	MySQL
Security	Burp Suite
Cloud	AWS (S3, EC2 - Familiar)
AI Tools	GitHub Co-Pilot, MCP, Claude Code, n8n
Testing Types	Functional Testing, Regression Testing, Cross-browser Testing, Smoke Testing, Integration Testing

KEY PROJECTS

Capture — US Property Tax Administration System *Tanama Software*

Tax Domain | Revenue Systems | Government Applications | Data Compliance & Backend Validation

- Ensured compliance, data accuracy, and end-to-end backend validation for a statewide property tax revenue system serving the State of Alabama, USA. Maintained 100% RTM coverage and zero P1 defects at release.

Fluke Biomedical — Medical Device Testing & Validation *Seanergy.ai*

Medical Device Testing | Healthcare Quality Standards | System Reliability | Compliance Validation

- Performed medical device testing for Fluke Biomedical, validating system accuracy, reliability, and adherence to healthcare quality standards. Executed automation using Playwright with TypeScript, achieving a 30% reduction in post-release defects.

EDUCATION

B.Tech, Electronics & Communication Engineering *Sree Chaitanya Institute of Technological Sciences | 2018 – 2022*

CERTIFICATIONS

- Quality Analysis Methodologies, Requirements Gathering & Process Improvement — SS Global Solution
